SUMMARY

Software engineer with 5+ years building scalable, user-centric web applications in Angular and React with a genuine automation streak. Have co-owned frontend of a 200+ user healthcare product, shipped end-to-end features solo, and built Python + Playwright automations that cut processing time by 60%. Actively integrating AI tools into development workflows to accelerate delivery and problem-solving. Looking for a product-focused SDE-2 role where I can own frontend delivery and bring automation thinking to how the team works.

EXPERIENCE

Executive-Enrichment, *Straive, Chennai*

Dec 2025 – Present

- Volunteered and sole-built a Python + Playwright automation for Cloudflare-protected publisher sources cutting processing time by 60% (10 15 min 45 min/title), enabling parallel scraping of 200 titles/day; demo approved by tech and management. (Python, Playwright, XML)
- Managed title categorisation and end-to-end data extraction for assigned academic journal titles configuring XML inputs, executing Perl-based web crawlers for metadata and PDF retrieval, and delivering structured Excel outputs for quality review. (Perl, XML, web crawlers)

Independent Consulting & Product Work

Oct 2023 - Dec 2025

- Built reusable React dashboard components and workflow features as a Frontend Engineering Intern at Witting.AI, contributing to end-to-end feature delivery in an agile product team. (React, JavaScript, HTML/CSS)
- Independently led operational digitisation for an agri-distribution business (Rathnatraya, Hassan) architecting collaborative workflows across procurement, stock, billing, and document management, eliminating manual sync overhead and improving real-time visibility. (Google Workspace, web)
- Certified yoga instructor; taught independently while pursuing wellness certifications and personal development. (Aug 2023 Apr 2025)

Associate Software Engineer, *Biofourmis India Pvt Ltd, Bengaluru*

Apr 2022– Jul 2023

- Co-owned frontend development of a Patient-Caretaker healthcare web app (200+ users) as 1 of 2 frontend engineers, delivering 3 features end-to-end including dynamic data entry forms and drag-and-drop care path editing. (Angular, TypeScript, RxJS)
- Reduced clinical data entry time by building dynamic, validation-driven forms and interactive dashboards integrated with REST APIs improving speed and accuracy for 200+ patients and caretakers. (Angular Reactive Forms, REST, HTML/CSS)
- Increased codebase maintainability and scalability by architecting reusable Angular components, modular routing, and structured sidebar navigation enabling faster feature iterations across the product. (Angular, TypeScript, lazy loading)

Digital Engineer, *Sonata Software, Bengaluru*

Jan 2021– Apr 2022

- Co-built an internal Skill Management Portal as the sole frontend engineer in a 2-person team designed UI in Figma and implemented in Angular and Razor Pages, enabling structured skill tracking for internal HR and ops workflows. (Angular, Razor Pages, Figma, HTML/CSS)
- Contributed to a client-facing Progressive Web App in an enterprise environment resolving bugs and shipping minor feature improvements to maintain production stability. (Angular, PWA, HTML/CSS)

PROJECTS

NoScene - *Deals. Assignments. Sorted.*

- Solo project, ongoing no-scene.vercel.app
- Built and actively expanding a full-featured Angular + TypeScript web app solo architecting component-driven, modular codebase with lazy-loaded routing, RxJS state management, and reactive form validation across multiple feature modules.
- Implemented responsive, mobile-first dashboards and listing interfaces with structured data models prioritising performance, usability, and clean design throughout.
- Continuously shipping new modules and features to production on Vercel treating this as a live product, not a portfolio piece.

SKILLS

Frontend : Angular, React.js, TypeScript, JavaScript (ES6+), HTML/CSS, Tailwind CSS, RxJS, Angular Reactive Forms, Lazy Loading, PWA

Automation & Scripting : Python, Playwright, Perl, XML configuration, Web scraping

Tools & Workflow : GitHub, Bitbucket, Jira, Trello, Notion, Google Workspace

Certifications : Google AI Essentials & Google Project Management Specialization Certification (Coursera)

EDUCATION

Bachelor of Engineering, Information Science and Engineering

Visvesvaraya Technological University, Belagavi

Aug 2016 – May 2020
